LA TECNOLOGIA PER LAVABI

THE TECHNOLOGY FOR BASIN

RETTIFICA

RECTIFICATION

La rettifica è una parte cruciale nella produzione delle console da incasso: operazione che permette di avere un lavabo che aderisce perfettamente alla superficie del mobile.

L'operazione di taglio e rettifica viene realizzata ad acqua che viene recuperata e riutilizzata in un ciclo continuo per un minore impatto ambientale.

Grinding is a crucial part in the production of built-in consoles: an operation that allows you to have a washbasin that adheres perfectly to the surface of the furniture. The cutting and grinding operation is carried out by the use of water which is recovered and reused in a continuous cycle and with a lower environmental impact.

TROPPO PIENO

OVERFLOW

L'ampia conoscenza delle tecniche di lavorazione permette di realizzare lavabi con il foro del troppo pieno completamente smaltato così da evitare l'utilizzo di accessori di copertura come ghiera e tappi.

Extensive knowledge of production techniques allows the creation of washbasins with completely enamelled overflow holes so as to avoid the use of covering accessories such as ferrules and caps.
